Objective
The Chemical Engineering Department of University of Technology and Mithidria Refinery Company is organizing a conference in Oil Refining in the period 14-15 May 2013. The conference aims to bring together researchers, scientists, and academics active in the field of oil refining processes. The conference looks ahead to cover a wide range of interdisciplinary topics in petroleum refineries.

Conference Topics
- Modern Technologies in Oil Refining Processes
  - Quality Control and Production Development
  - Catalysis Technologies, Chemical Additives and Substitutes
  - Oil Industry and Environmental Pollution
  - Modern Pollution Technologies for Carbon and Selective Metals Replacing
- Nanotechnology in Refining Industry
- Maintenance and Its Effect on Production Sustainability

The conference supervising committee is striving to make this event one of the most important scientific gatherings in Iraq. All Abstracts will be submitted to review by Conference Scientific Committee, and researchers will be notified upon acceptance, along with the instructions for submitting full manuscript. All accepted papers will be revised for publication in the special proceedings, which will be edited and published by University of Technology, Iraq. Researchers are invited to submit their abstracts for presentation to the conference email no later than 10/2/2013.
