

## Send a report to the province of Basra

### *First: the scientific cooperation with the University of Basra*

Was made an official meeting with Mr. Dean, Faculty of Engineering and Heads of Departments in the college. Where they were discussing ways to promote scientific communication between the departments of the college at the University of Basra and the oil in the technology department, University of Technology. It should be noted here that this scientific communication was the result of the Memorandum of Understanding signed between the joint and the two universities.

### *Second: The scientific cooperation with the Southern Oil Company*

Visit was the Southern Oil Company in Basra province on Monday, 27/12/2010. Where he was an official reception to us by the Directors of the Company, after which a meeting was held with the Director of the petroleum operations in the company (on behalf of Mr. Abdul Karim Nasser). During the visit of the company were the following:

- 1 - See Mr. Director-General of the Southern Oil Company (Mr. Deyaa Jafar) on a draft memorandum of understanding proposed by the Department of Oil Technology, where he circulated to all directorates of the Southern Oil Company in order to make observations in order to take the proposed draft of the memorandum of understanding signed by the final form between parties.
- 2 - initiated by the Southern Oil Company donated the PT department rock oil samples belonging to the oil wells taken different drilling depths. And that's upcoming that enhance the practical side to study the geology of oil in the department.
- 3 - Also initiated the Southern Oil Company donated the IT department of the oil group of scientific and geological maps of the reservoirs belonging to the oil fields of the company.
- 4 - From the other hand, promised to the Southern Oil Company to take it upon themselves to create and provide models of drilling equipment expendable for the purposes of training students in the Department oil technology. Through the direction of the drilling belonging to it (which is located outside the city of Basra), and soon through coordination with them.
